

## Human Geography

### Constructing a Population Pyramid

Name: \_\_\_\_\_  
 Section: \_\_\_\_\_  
 Score: \_\_\_\_/5

Directions: Construct population pyramids using the data for the countries provided. A population pyramid is drawn by putting a vertical line in the appropriate square for each age and sex. Once you're finished answer the questions on the backside.

Age	Country 1		Country 2	
	Male	Female	Male	Female
	%	%	%	%
0-4	9.8	9.8	3.3	3.2
5-9	7.5	7.5	3.4	3.5
10-14	6.5	6.8	3.5	3.5
15-19	5.5	5.7	3.2	3.2
20-24	4.2	4.2	3.5	3.3
25-29	3.1	3.2	3.9	3.9
30-34	2.5	2.9	3.9	3.9
35-39	2.0	2.4	3.0	3.1
40-44	1.9	2.2	2.6	2.9
45-49	1.5	1.9	2.7	3.0
50-54	1.1	1.7	2.8	3.1
55-59	1.0	1.3	2.8	3.3
60-64	0.6	1.1	2.6	3.1
65-69	0.3	0.6	2.4	3.0
70-74	0.2	0.4	1.9	2.6
75+	0.1	0.4	2.2	3.6

Constructing a Population Pyramid Questions

Name:

Section:

Score: \_\_\_\_/5

1. Based on the information come up with three **inferences** about each country.

Country 1

Country 2

2. Which pyramid do you think is the more developed country (MDC)? Explain your reasoning.

3. Try to determine what region both of the countries are in (or the specific country itself). Explain why you think it is in that area.

Country 1

Country 2
