Free Response Question

1. Rostow’s five-stage model of economic growth and the core-periphery concept of Wallerstein’s three-part world system theory are two of the more common economic development models.
   
   A. Identify and compare three differences between the stages of economic growth and the core-periphery model.
   
   B. Use one of the two models to explain the level of economic development in either Mexico or Brazil.
   
   C. Give two examples of how the core-periphery concept can be applied below the national scale.
