

Behavioral Science

Comparing Behaviors

Name:

Section:

Directions: Use the form below to conduct an experiment between guests and animals on the zoo grounds. Come up with 5 or more similarities between the behaviors based on marked observations. Work with a partner to discretely record your observations (5 each) on a piece of paper or iPad and then record them into this form once you are back in the classroom. You only have 15 minutes to complete this activity so choose a location that is relatively close.

Record your observations	
Partner 1	Partner 2
1.	1.
2.	2.
3.	3.
4.	4.
5.	5.

Thought Questions:

1. What were the similarities between your observations?
2. What made this activity easy to complete?
3. What made this activity difficult to complete?
4. Based on this activity what is a potential research question that you could develop?
