Design an Eco-Adventure Project Overview

Name:

Section:

Directions: You're planning out an Ecoadventure to a region of the world of your choice. As part of the planning process you need to figure out what you want to see, how long you want to spend in different places, how much it is going to cost, and what you are hoping to get out of your ecoadventure.

Seniors will compile a simple powerpoint or pdf, and juniors will build their tour through Google Tourbuilder, We-Explore, or as an ArcGIS StoryMap.

For all Students:

- Describe one ecological issues that is affecting your location
- Describe one humanitarian issue that is affecting the people who live in your location
- A cost assessment of what it would take to complete your tour
 - o Cost must be lower than \$7,500 USD
 - o Costs need to be itemized
- Select 10 different "highlights" of your trip
 - o No more than 2 of them can be cultural sites (buildings, markets, etc...)
 - o A paragraph explaining why the site is significant enough to be on your tour
- An explanation of an organization that is working to conserve the area
- Paragraphs explaining
 - o Justification
 - o Ecological work being done
 - o How you would benefit from this trip
- Four steps you would take to reduce carbon footprint on trip

For Juniors:

- A digital tour that guides viewers through your 10 locations
- Includes all information from the categories above
- A day-by-day schedule including:
 - o Costs per day
 - o Tour will be 7-10 days long
 - o What sites you would see on each day
 - o How you'll get around each day (and costs)
 - o Accommodations (and costs)
- A digital map that shows the locations of the tour

Costs to Think About (USD):

- Flights (in and out of a major airport)
- Accommodations (list of accommodations and price per night / along with how many nights you will be at each place)
- Costs and modes of transportation
- Cost of food to budget for day
- Entrance fees
- If planning on taking a tour list at least 2 providers with costs
