Directions: Use the online Psychological Research resources Psychology Today or Psych Central and find an article about a topic that interests you about a psychological research study. Use the article you found to answer the questions below.

1. Write down the citation for the article. The citation should be at the bottom of the article or you can use the website <u>www.easybib.com</u> as a guide to help you write the formal citation. The citation needs to be in proper MLA format.

- 2. Summarize the experiment being conducted.
 - a. What was the psychologist trying to test?
 - b. Record what the psychologist's hypothesis was (if given).
 - c. What method(s) did the psychologist use to collect data?
 - d. What were the results of the experiment? Did the results turn out how the psychologists thought? Why or why not?
- 3. Was this experiment a Basic, Applied, or Evaluative study? Explain
