

## World Geography

Finding the Five Themes

Name: \_\_\_\_\_  
Section: \_\_\_\_\_  
Score: \_\_\_\_/\_\_\_\_

Directions: You will need to find an article from the newspaper, the internet, or a magazine that represents the 5 themes of geography. You may use multiple articles if you need to, but between the articles all Five Themes must be represented in some way. Website must be from a reputable source.

What you need for each article

1. Which of the 5 Themes the article represents
2. Copy of the Article
  - a. Article must be from within the last week
3. Citation of where you found it
  - a. Including title, who wrote it (if provided), source, date published, date collected
  - b. If you need help with citation try using easybib.com
4. Explanation
  - a. Using evidence from the article explain how the article represents one of the themes of geography.
5. Article pulled from a reputable source
  - a. No Wikipedia, Onion, etc...

Example:

### Human-Environment Interaction

Citation:

"China Flash Floods Kill 21 Workers in Qinghai Province." *BBC News*. BBC, 21 Aug. 2013, 26 Aug. 2013.

Explanation:

This article represents Human-Environment interaction because it talks about how humans are drawn to the area because of its natural beauty, but then there is always the threat of sudden rain storms that can wash away human settlements and people.

### China flash floods kill 21 workers in Qinghai province

At least 21 construction workers in north-west China have been killed by flash flooding that swept through a remote part of the province of Qinghai, state media have reported.

The official Xinhua news agency said that they were "washed away" after a sudden torrential rain storm.

The area lies in high mountains 2,500km (1,500 miles) west of Beijing.

Flash floods are a frequent threat both to residents there and to travellers drawn by its mountain scenery.

On Monday at least 105 people were killed and 115 were missing after floods and a typhoon hit various parts of north-eastern and southern China, state media reported.

Chinese Premier Li Keqiang has called for "persistent efforts" to save people in the north-east from what Xinhua described as "the worst floods in decades".

Weather experts have warned that another storm is expected to hit China on Thursday.
