

World Environmentalism

Global Protected Areas

Name:

Instructions: Use the Webmap for the World Database of Protected Areas (WDPA) (<https://arcg.is/0PiXnW>) to develop an inquiry style question and then plan out a path of analysis with a possible action plan.

Work with a table partner to develop your question, analysis plan, and action proposal

1. Develop an inquiry style question that you could use the data in this map to begin to answer. (Remember an inquiry style question is going to include a combination of the elements "where?" "Why there?" "Why care?" and "What can be done?"

2. What type of analysis would you like to do on this data that would help you answer your inquiry question? What are you hoping your analysis would show you?

3. What could you potentially do with your analysis? What form of action plan can you start working on based on what you believe your data will show you?
