

# Ecological Biogeography

## Unit II Review – The World's Physical Regions

Name:

Section:

### Directions:

For each of the Regions and Biomes below be able to explain and identify:

- Location
- Characteristics
- Species Adaptations
- Ecological Issues

### Arid and Semi-Arid Regions

- Desert (Hot)
- Chaparral/Mediterranean

### Marine Ecosystems

- Coastal
- Open Ocean
- Freshwater

### Tropical Forests

- Tropical Rainforest
- Tropical Dry Forest
- Tropical Coniferous Forests

### Grasslands

- Tropical Savanna
- Flooded Grasslands and Savannas
- Temperate Grasslands

### Alpine Biome

### Temperate Forests

- Boreal Forest/Taiga
- Northern Evergreen Forests
- Temperate Deciduous Forest

### Polar Regions

- Taiga/Boreal Forest
- Ice Cap
- Tundra
