

World Geography

World Biomes Location

Name:

Section:

Score: ____/5

Directions: Use your textbook and an atlas to answer the following questions connected to the location and characteristics of certain biomes.

1. Look at the Equator, What Biomes does it go through?
2. How many different Biomes are in China? List them
3. Find a country that only has one biome. What country is it and what biome is it?
4. Which country has the most biomes? What Biomes are they?
5. What are the Ice caps and where are they?
6. Using what you know about biomes, which biomes do you think it would be difficult for a human to live in (Choose 2)? Why would they be hard to live in?
7. Look at the biomes map and compare it to a population density map. Which areas of the world have very few people living there? What biomes are those regions in? Why do you think there are few people there?
8. Explain why can so many people live in eastern China, but not in western China?
9. Why are Temperate Grasslands good for farming?
10. Look at your biome map(pg78) and your population map (pg88). What do you notice about Russia? Why can so many people live in the west, and so few in the east?
